CHALCEDONIA

BY LAURA HAMMETT + COUTURE EDITIONS

Agate and Onyx are enchanting chalcedonic stones known for their incredible variety and the uniqueness of their composition.

Leading interior designer Laura Hammett and Couture Editions have collaborated to create this limited-edition collection of macro-photographic artworks that capture the delicate beauty of these intricate crystal structures, revealing the multitude of translucent layers, subtle hues and fluid forms contained within them.

The oversized artworks completely distort the scale, transporting you into another world of aerial land and seascapes, creating a sense of liquid-in-motion. The beauty of these abstract works is that they are completely personal, leaving each viewer to interpret what their eyes and imagination see.

Each section of stone was selected and illuminated to appear as a single piece of abstract art, or to be hung as a curated collection in a variety of sizes and bespoke frame types, each designed and hand-crafted especially for this series.
